

Achieve Operational Excellence!

We know you are keen to improve your company's performance, to increase customer satisfaction and profits. We have an approach to help ensure this happens. Research confirms customer centric Operational Excellence as a key attribute of leading companies in any industry. Equipped with an excellent operating model, having the right technology strategy driving towards digital transformation and following the right continuous improvement execution path, companies will gain competitive advantage regardless of economic environment.

We are an organization passionate about Operational Excellence and the power of Continuous Improvement. This is what we do by providing people with such expertise through personal interaction in programs, projects, workshops, trainings, seminars and social media.

Development & collaboration

CorePartner Concept – CiCONS, Leverage & Remente

Our CorePartner concept has been designed to provide a complete, successful concept for companies to turn into a customer centric, flow efficient and continuous improvement focused company. The concept covers the three areas Strategy, Daily Steering as well as Execution and includes a system for continuous measurement. Please contact us for more information.

Psykologpartners Collaboration

What has Behavioural Psychology to do with Operational Excellence, Lean and 6Sigma – a whole lot we think. It is all about the human in the system, creating business value and sustainable change. In January Senior organizational psychologists from [Psykologpartners](#) started to explore ways of collaboration with senior management consultants from [CiCONS](#) A day full of laughs, discussions and lot of behavioural Psychology.

Partner Networking

In January, Göteborg Sweden we held a mid-term partnership conference with partners from IKMW, CiCONS, McKnight Gracie and LeanSo deepening discussions and practice on lean, six sigma, stakeholder management, motivation and competitiveness.

New Consultant in network – Gerd Faedtke

Gerd is a true expert in identifying and improving quality- cost-delivery performance with great experience in manufacturing, consulting and coaching. Earlier Gerd was responsible to optimize Ford's global/ European Supply Base for over 20 years and he spearheaded many improvement projects together with companies such as ZF, Bosch, Denso, Continental, Magna. Valeo, Lear, ThyssenKrupp, Faurecia, Brose.

☆☆☆☆☆☆
